Online Classroom Technology Requirements

Computer
Participants will need to have daily access to a computer that is capable of running the latest versions of internet browsers, plug-ins, and software.

Internet Connection
Participants will need to be connected to high-speed internet that will support interactive audio and video.

Webcam
Participants should have a webcam to support daily participation in class.

Microphone
If you are using a laptop with a built-in microphone, we recommend that you use headphones during live class sessions to avoid echo or feedback. If possible, we suggest that you use a USB-based headset with a microphone for clear audio when participating in class.

Suitable Learning Environment
Do your best to choose a comfortable, distraction-free learning space for the live class meeting times. Keep in mind that the setting should be appropriate for interacting with instructors and fellow students on camera.
